Engaging the New Era

Increasingly data is changing our lives and driving progress, but kids aren't taught to understand it or use it effectively. Those with data skills will have an advantage as this field develops, so it's important to teach all kids about data.

Visualisations

Analytics Pro

HOME ABOUT US SERVICES TEAM CONTACT

Visualizations

interactive visualisations that help students understand and explore the data

Global Weather Data

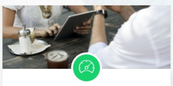
Visualization of weather conditions from past to present globally

Upcomming Predictions

Prediction of the future using deep learning algorithims

ABOUT US

We turn Data into Visuals and Predict What's Next!



Our Mission

To help teachers and students to explore datasets in an interactive and engaging way without needing serious tech skills

Our Plan

To turn the global village into transparent visualizations and then predicting the upcomming possibilities

Our Vision

To express the complex view of data visually and make this river of chunks, understandable to all!

SERVICES

Simulation

we provides the simulation of weather conditions of all the countries around the globe

Statical Representation

We provide our simulations in the form of different charts including bar graphs, histograms, line graphs, Cartesian graphs etc.

Prediction

We believe in knowing the future and that is what we provide

Sample Prototype

Are you eager to see our work? Just press the button bellow to see our current work and see our way to define data!

VISUALIZATION SAMPLES

OUR SKILLS

We have one of the most capabale Developers that possesses extensive skillset

NODE JS	100%
BOOTSTRAP & JAVASCRIPT	100%
D3 VISUALISATIOS	100%
PYTHON	100%
